WELCOME BACK TO PFD WEEK!

On behalf of the entire Program Committee, I am so excited to welcome you to Phoenix for our 42nd Annual Scientific Meeting.

The events of the last year and a half have resulted in a period of great reflection and innovation. As healthcare providers and individuals, we have made vast adjustments in our lives. Amongst the many changes we have made in our daily lives, we have learned new ways to treat patients, interact with our peers and friends, and gain education. This year’s meeting theme, Reimagining the Future: A New Beginning Today, expands on these lessons with a hopeful look forward.

This theme will be explored in the content of the meeting, with sessions focused on cutting-edge technologies and innovations, as well as sessions exploring diversity, equity and inclusion challenges and efforts in medicine and within our organization. The theme is also being put into action in the delivery of PFD Week 2021 – this year, for the first time, individuals will be able to participate in person or virtually. For those of you here with us, we encourage you to connect with the virtual participants through the virtual meeting platform, which is accessible on your desktop or through the mobile app.

While we look towards the future, we must acknowledge that currently COVID-19 still poses a threat. We have taken a number of measures to ensure your safety while you are here at PFD Week. All attendees, industry partners and AUGS staff members provided proof of vaccination prior to arrival. We have moved many of our meal spaces and social events outdoors and ask that when you are indoors, you keep your mask on and social distance when possible.

We look forward to a safe and exciting week here in Phoenix – thank you for joining us!

MEETING CODE OF CONDUCT
AUGS is committed to providing a safe, professional, and productive meeting environment that fosters open dialogue and the exchange of scientific ideas, promotes equal opportunities and treatment of all participants, supports diversity, and is free of harassment and discrimination.

Speakers are expected to demonstrate scientific integrity and professional ethics. AUGS recognizes that professional and well-intentioned scientists and clinicians can and do disagree; PFD Week is intended to serve as a forum to consider and debate science-relevant viewpoints in an orderly, respectful, and fair manner. All participants are expected to treat others with respect and consideration and alert staff or security of any dangerous situations or anyone in distress. This statement applies to all attendees, speakers, exhibitors, staff, contractors, volunteers, and guests at the Annual Meeting and related events.

AUGS will not tolerate any form of harassment, sexual or otherwise. Harassment includes speech or behavior that is not welcome or is personally offensive, whether it is based on ethnicity, gender, religion, age, body size, disability, veteran status, marital status, sexual orientation, gender identity, or any other reason not related to scientific merit. It includes stalking, unnecessary touching, and unwelcome attention. Behavior that is acceptable to one person may not be acceptable to another, so use discretion to be sure that respect is communicated. Harassment intended in a joking manner still constitutes unacceptable behavior. Retaliation for reporting harassment is also a violation of the Code of Conduct, as is reporting an incident in bad faith. Harassment should be reported immediately to an AUGS staff member.

AUGS and the PFD Research Foundation have created the ABLE Initiative and Lecture to honor the contributions of Anarcha, Betsey, Lucy and the women whose names were not recorded, who were enslaved women subjected to experimentation by Dr. J. Marion Sims without consent or anesthesia. While Dr. Sims was heralded as the Father of Gynecology as a direct result of the success of these experiments, Anarcha, Betsey, Lucy and their personal sacrifices were forgotten. This lecture will honor their legacy and shine a light on the health disparities that continue to exist today.

AUGS Innovation Lecture: Decoding DaVinci - Clinical Applications of Pelvic Neuroanatomy
FRIDAY, OCTOBER 15 | 10:40 AM – 11:15 AM
Canyon Ballroom

Nucelio Lemos, MD, PhD
University of Toronto

Nucelio Lemos underwent his medical graduation, as well as his Gynecology, Urogynecology and MIS training and PhD in Gynecology in São Paulo, Brazil and attended a Fellowship in Pelvic Neurodysfunctions by the International School of Neuropelveology in Zurich, Switzerland.

Upon returning to São Paulo, he founded the Pelvic Neurodysfunction Clinics of the Department of Gynecology of the Federal University of São Paulo, which he still chairs and where he develops extensive research and teaching of all fields of Neuropelveology: treatment of Intrapelvic Nerve Entrapments and Neuropathic Pain of Intrapelvic Etiology; Knowledge Transfer in Nerve-Sparing Radical Pelvic Procedures (including endometriosis and pelvic malignancies); and rehabilitation of paraplegic patients through the Laparoscopic Implantation of Neuroprosthesis.

He is past Chairman of the Scientific Committee of the International Continence Society (2013-2016) and Founding Member and past Chairman of the Scientific and Education Committee of the Latin American Pelvic Floor Association (ALAPP; 2014-2019).

He serves as Associate Professor on the Faculty of Medicine of the University of Toronto, where he has started the Pelvic Functional Surgery and Neuropelveology Clinic, and at the Department of Obstetrics and Gynecology of Mount Sinai and Women’s College Hospitals where he continues to develop the research started in Brazil.

He is also a Founding Member and Vice-President of the International Society of Neuropelveology and a member of the Board of Directors of the American Association of Gynecologic Laparoscopists (AAGL).

His lecture will review the anatomy of the nerve bundles crossing the pelvis; discuss the main steps where nerve damage can occur during gynecologic procedures and strategies do avoid it; relate the symptoms and signs resulting from intrapelvic nerve damage; and discuss other applications of the laparoscopic dissection of intrapelvic nerve bundles.

The AUGS Innovation Lectureship Award honors an individual who has demonstrated innovation in urogynecology, specifically demonstrating excellence in the development of new techniques (including diagnostic techniques), technology, outcome measures, educational initiatives, product development or other activities that support the goals of this Lectureship.
