Feinberg School of Medicine

Female Pelvic Medicine and Reconstructive Surgery

Northwestern University

Fellowship Program Name: McGaw Medical Center of Northwestern University

Address:

250 E. Superior
Suite 05-2113
Chicago, IL 60611

Phone: 312-472-3874

Fellowship Program Director: Margaret Mueller, MD

Associate Program Director: Christina Lewicky-Gaup, MD

Fellowship Coordinator: Kelley Kinnucan

Email: Kelley.Kinnucan@nm.org

Description:

Northwestern is uniquely situated geographically in downtown Chicago with a strong brand in women's health care, research, and academics in gynecology and Urology. The FPMRS Division at Northwestern University offers multidisciplinary treatment, research, and educational endeavors in female pelvic floor disorders where patients can benefit from the latest treatments and opportunities by participating in (1) clinical research trials for urinary incontinence, bowel control problems, and pelvic organ prolapse; and (2) a state-of-the-art, multidisciplinary integrated, pelvic health center with experts from Urogynecology, Urology, Colorectal Surgery, Gastroenterology, Physical Medicine and Rehabilitation, and Physical Therapy.

Northwestern University Feinberg School of Medicine's ACGME-accredited fellowship program in Female Pelvic Medicine & Reconstructive Surgery (FPMRS) is an integrated training program supported by the Departments of Obstetrics & Gynecology and Urology. The primary aim of the FPMRS fellowship is to train surgeon scientists to provide excellent clinical and surgical care to women with complex pelvic floor disorders and become independent investigators. The fellowship is a three-year training program for gynecology applicants or a two-year program for urology applicants after successfully completing primary training in urology or gynecology. Two years are dedicated to clinical and surgical mastery of urinary incontinence and pelvic floor disorders, and the equivalent of one year is dedicated to clinical and translational research. We anticipate that our fellows will go on to advance women's pelvic floor health as skilled surgeon-scientists and committed mentors and educators while providing exceptional clinical and surgical care. Our fellowship program balances clinical-surgical care, scholarship, and research, as we believe learning to balance these activities during training is crucial to ongoing success as academic leaders.

We accept one fellow per year (3-year program) with a full complement of 3 fellows. Based on qualifications, fellows will be accepted from Obstetrics & Gynecology and Urology backgrounds. For more information, please visit our website: NU FPMRS

Requirements:

- Satisfactory completion of an accredited Obstetrics & Gynecology or Urology residency program

Program Length: 3-years

Number of Fellows: 3

Urogynecology Core Faculty: Kimberly Kenton, MD, MS, Christina Lewicky-Gaupp, MD; Margaret Mueller, MD; Sarah Collins, MD, Julia Geynisman-Tan, MD; C. Emi Bretschneider, MD; Oluwateniola Brown, MD
