Fellowship Coordinator: Dawn Maziarz

Address: 3 Cooper Plaza
Suite 221
Camden, NJ 08103

Phone: 856-342-3006

Fax: 856-365-1967

E-mail: Maziarz-Dawn@cooperhealth.edu or Holzberg-Adam@cooperhealth.edu

Description: Our program provides our fellows during their three-year training with a multidisciplinary approach to training in pelvic floor disorders including urinary and fecal incontinence, other benign bladder disorders, pelvic organ prolapse, pelvic floor dysfunction, female sexual medicine, congenital anomalies, as well as the requisite investigative and scholarly skills, to begin a career in academic FPMRS. Our program has an active didactics schedule with special focus not only on research and clinical expertise but also on the business of medicine. Fellows' education experience is enhanced through outside rotations at Thomas Jefferson University and through monthly virtual didactics and in person meetings with invited speakers. Surgical education includes a balance of vaginal and abdominal, laparoscopic and robotic techniques. Fellows have the opportunity to pursue their FPMRS interests in global medicine as there are opportunities for international health electives in Ghana. Unique opportunities include a laparoscopic dry lab, exposure to the robotic simulator, and collaborative research opportunities with Cooper University Hospital and Cooper Medical School of Rowan University clinicians and basic scientists. Our division's faculty is well respected nationally for their skills in vaginal reconstructive surgery and they are considered key opinion leaders in their field. They are founders of international mission organizations that provide much needed care to women around the world. Former fellows have had the opportunity to provide mission work around the world and these numerous unique opportunities continue to enhance our program.

Requirements: All fellow applicants should have satisfactorily completed an Obstetrics and Gynecology OR Urology residency approved by the American Council for Graduate Medical Education (ACGME) or the Council of the Royal College of Physicians and Surgeons of Canada (CRCPSC).

Program Length: 3 Years for Ob/Gyn residency, 2 years for urology residency
