Dear Colleagues,

On behalf of the American Urogynecologic Society (AUGS) and the International Urogynecological Association (IUGA), we are pleased to welcome you to the 2019 Scientific Meeting in Nashville, Tennessee, USA!

For the second joint meeting of our societies, the Program Committee focused on the theme, “advancing physician and patient wellbeing & wellness”. Throughout the meeting, presentations will focus on the paramount importance of physician wellbeing in their selfless pursuit of patient wellness.

There is truly something for everyone at this meeting. With a selection of 29 half-day workshops, cutting edge research presentations, panels on the latest hot topics in FPMRS, and focused programming for fellows, basic scientists and advanced practice providers, each meeting participant will have the chance to create their own experience.

In addition to the exceptional science, what makes the AUGS/IUGA meeting special is the opportunity for attendees to connect with colleagues and experts from around the globe. We encourage you to participate in the networking events throughout the week, including the Welcome Reception in the Exhibit Hall and the Friday Night Party. Join us for a 5K Run/1 Mile Walk around Nashville to support the FIUGA and PFD Research Foundation.

We hope you take some time to explore Nashville with your colleagues and new connections. Unwind and relax amidst the expansive culinary scene and enjoy the live music found around every corner.

Welcome!

Medical professionals have unfortunately become all too easy targets for many trial attorneys. Learning how to use legal entities is vital to protect everything they have worked hard to achieve. Setting up C-Corps, and LLCs is only part of the answer to this rapidly growing issue. This course will also instruct attendees on how to protect one of their most important assets, their medical license. Even if they aren’t sued for a larger amount than what their malpractice insurance covers, all medical professionals will encounter being investigated and possibly sanctioned for issues unrelated to the reported lawsuit. Utilizing three legal tools, in many cases, can decrease malpractice insurance costs and drastically reduce their income taxes - all while keeping their name and license from being reported to the NPDB.

Paul Mohapel wears many hats - he is a consultant, lecturer, educator, researcher, and a facilitator. He uses his extensive knowledge of the brain, psychology and leadership to design and facilitate workshops in organizational development, and to lecture at several universities in leadership, business, and psychology.

Are you overwhelmed with the volume of daily emails you receive? Do you find yourself trying to do ten things at once? Do you have trouble concentrating for sustained periods of time because so many things are vying for your attention? You are not alone. Recent healthcare research suggests that increasing distractions, particularly those due to digital multitasking, are contributing to greater stress and burnout, poorer focus, and reduced productivity. This session will report on recent startling psychological and neuroscience research on the negative impacts of multitasking. The session will offer useful approaches to reduce distractions and enhance focus in order to improve well-being and productivity.

Cure of pelvic floor dysfunction is elusive. Our ability to improve women’s lives is hampered by treatments that are evolving, poorly defined therapeutic goals, and poor communication and understanding of patients (and providers) of what cure looks like.

This lecture will discuss the definition of “cure” of pelvic floor dysfunction, describe pelvic floor and health outcomes that matter to patients and describe what care in 2040 when we redefine our care focus to meet outcomes important to patients.

Dr. Rogers received her medical degree from Harvard University and pursued residency in Obstetrics and Gynecology and fellowship in Female Pelvic Medicine and Reconstructive Surgery at the University of New Mexico. There, she established the Division of Urogynecology. In 2017, she moved to Austin, Texas and is the Director of the Women’s Health Institute and Associate Chair for Clinical Integration and Operations at Dell Medical School. At Dell, her focus is on bringing value-based care to women with complex gynecologic conditions and measuring outcomes important to patients.

IUGA established the Ulf Ulmsten Lecture in 2004 with the purpose of promoting innovation in Urogynecologic surgery and encouraging innovative thought processes among our IUGA members.
