PFD WEEK 2017

Dear fellow AUGS Friends and Colleagues.

Welcome to the AUGS 38th Annual Scientific Meeting in beautiful Providence, Rhode Island, where the city motto is, "What Cheer!"

The 2017 AUGS Pelvic Floor Disorders (PFD) Week is the go-to meeting for healthcare professionals interested in or actively practicing Female Pelvic Medicine and Reconstructive Surgery. We are excited to kick off the meeting festivities.

The 2017 Program Committee and I have created a robust scientific program showcasing national and international research of the highest caliber on relevant topics that can be immediately implemented into your practices. This year's event features a wide array of learning opportunities, including 18 workshops chaired by experts in the field, 25 roundtable discussions, and more than 200 oral, oral poster, poster, and video presentations.

New conference features include a clinical seminar and surgical tutorial as well as a master surgeon session. Other meeting highlights are the not-to-be-missed interactive and lively debates, and three very relevant expert panels on product liability, payment reform, and prevention of urinary incontinence incorporating the most up-to-date evidence on behavioral and basic science.

PFD Week is a great opportunity to connect with friends and colleagues—old and new! We encourage you to utilize our networking events and dedicated Exhibit Hall times to connect with exhibitors and share lessons learned and best practices. For all you divas and divos out there—please join us for the Friday AUGSome Beach Carnival at the WaterFire Arts Center! The AUGSome Beach Carnival is family-friendly and offers a perfect opportunity to relax and showcase your singing and dancing talents. We are all so excited to see your creativity during this year's karaoke challenge!

We hope you enjoy your time in Providence and return home with an expanded network, a renewed spirit, and more knowledge to share.

In Peace and Good Cheer,

Charle B. fluir, O.D.

CONTINUING EDUCATION

WHO SHOULD ATTEND

PFD Week is for physicians, nurses, physical therapists, students, researchers, educators, and other healthcare professionals interested in Female Pelvic Medicine and Reconstructive Surgery. New treatment techniques and developments in both surgical and non-surgical settings will be shared through a variety of educational formats designed to encourage interactive discussion. Scientific material will be presented through lectures, posters, videos, recorded surgeries, and tips and tricks presentations.

EDUCATIONAL GOALS AND OBJECTIVES

- Describe and discuss the pathophysiology of pelvic floor disorders, including pelvic organ prolapse, urinary incontinence, fecal incontinence, and sexual dysfunction
- Identify risk factors and the epidemiology of pelvic floor disorders
- Delineate the impact of pelvic floor disorders on the quality of life for women who suffer from these conditions
- Review and discuss the tools to assess and quantify pelvic floor disorders
- Explain non-surgical and surgical treatments used to manage pelvic floor disorders
- Identify methods for preventing lower urinary tract symptoms
- Review methods for treating mesh related complications
- Identify methods to avoid nerve injury during pelvic surgery
- Describe indications for uterine preservations during prolapse surgery

Change doesn't take commitment, leadership, or collaboration...

It takes all three.

As leaders in Urology, we relentlessly pursue new science to make a difference in patients' lives. We make it our priority to stay on the cutting edge of urologic research to address unmet clinical and patient needs. And our commitment extends beyond product development. We seek to support the Urology community and to improve the lives of patients with urologic disease.

Changing tomorrow together, today.

OCTOBER 9-13, 2018 * HYATT REGENCY CHICAGO * CHICAGO, IL

PRE-CONFERENCE WORKSHOP SCHEDULE

Pre-Conference Workshops require separate registration and are an additional fee.

TUESDAY, OCTOBER 3

8:30 a.m. - 12:00 p.m.

EVALUATION AND TREATMENT OF VESICOVAGINAL AND RECTOVAGINAL FISTULAS IN LOWER RESOURCE SETTINGS

Presented by the Global Health SIG

Room 550

Workshop Director: Saifuddin T. Mama MD, MPH, FACOG, FACS, FPMRS, *Cooper Medical School of Rowan University*

CONTINENCE BEGINS WITH PREVENTION: A NEW PARADIGM USING A TRANSDISCIPLINARY SCIENCE APPROACH

Room 555

Workshop Director: Alayne D. Markland, DO, MSc, *The University of Alabama at Birmingham*

CHALLENGES IN FPMRS SURGICAL CODING FOR 2017 AND BEYOND

Presented by the AUGS Coding Committee

Ballroom D

Workshop Director: Marc Toglia, MD, Sidney Kimmel School of Medicine

QUALITY IMPROVEMENT BOOTCAMP

Room 552

Workshop Director: Robert F. Flora, MD, MBA, MPH, McLaren

Health Care

1:30 p.m. - 5:00 p.m.

BUILDING ACADEMIC SUCCESS IN UROGYNECOLOGY: HEALTH SERVICES RESEARCH AND THE POWER OF BIG DATA

This workshop is free for Fellows

Room 551

Workshop Director: Donna Mazloomdoost, MD, *Pelvic Floor Disorders Network (PFDN) Gynecologic Health and Disease Branch*; Eunice

Kennedy Shriver, National Institutes of Health

COMPREHENSIVE APPROACH TO FISTULA CARE

Presented by the Global Health SIG

Room 550

Workshop Director: Rahel Nardos, MD, MCR, Oregon Health &

Science University

CODING CHALLENGES AND OPPORTUNITIES FOR OFFICE BASED ACTIVITIES AND PROCEDURES FOR THE FPMRS SPECIALIST

Presented by the AUGS Coding Committee

Ballroom D

Workshop Director: Marc Toglia, MD, Sidney Kimmel School of Medicine

INTEGRATING TECHNOLOGY INTO YOUR TEACHING ARMAMENTARIUM

Room 552

Workshop Director: Robert F. Flora, MD, MBA, MPH, McLaren Health Care

SURGICAL FAILURES: MANAGING THE ANATOMY, THE PATIENT, AND THE DOCTOR: GETTING IT RIGHT THE SECOND TIME

Room 555

Workshop Director: Christopher M. Tarnay, MD, FACOG, *David Geffen School of Medicine at UCLA*

WEDNESDAY, OCTOBER 4

8:30 a.m. - 12:00 p.m.

ENERGY BASED THERAPIES IN GYNECOLOGY AND VAGINAL HEALTH: LASER, LIGHT, AND RADIO-FREQUENCY THERAPIES

Ballroom D

Workshop Director: Kevin Stepp, MD, Carolinas Healthcare System

NEUROPATHOLOGY OF CHRONIC PELVIC PAIN DISORDERS

Room 551

Workshop Director: Bruce S. Kahn, MD, FACOG, *Uniformed Services University School of Medicine*

A TRANSDISCIPLINARY APPROACH TO MATERNAL BIRTH TRAUMA: A DAY IN THE LIFE OF A PERINEAL CLINIC

AUGS AQUIRE Quality Improvement Registry

AQUIRE is a Qualified Clinical Data Registry (QCDR). AQUIRE meets the reporting requirements for the CMS Merit-Based Incentive Payment System (MIPS).

Developed by urogynecologists for urogynecologists to measure and report healthcare quality patient outcomes:

- FREE Participation for AUGS Members
- Easy Web Data Entry
- Collect and Report on 20 FPMRS Quality Measures
- Fulfill MIPS Reporting Requirements
- Meet MOC Part IV Requirements
- Receive The Urogyn Quality Champion Designation

FELLOWS' DAY

WEDNESDAY, OCTOBER 4

Ballroom B

Join fellows and faculty from the AUGS community for a full-day program geared toward fellows' interests. There will be a panel discussion focused on how to find a job after fellowship, including experts from an academia, HMO setting, private practice model, and urology practice model, as well as an expert in contract negotiations.

We look forward to having you join us for this informative and interactive program. Residents are also welcomed to attend Fellows' Day.

GENERAL SCIENTIFIC SESSIONS

Sling Selections and What to do When They Fail!

Thursday, October 5

1:30 p.m. - 2:00 p.m.

Exhibition Hall C

Moderator: Lynsey Hayward, MD

Speakers: Matthew Barber, MD, MHS; Holly Richter, MD, PhD

This discussion will provide an evidence-based approach to the surgical management of stress urinary incontinence (SUI). Full length midurethral slings are placed via a retropubic or transobturator approach and data exists which may guide an individualized approach. Midurethral slings are the current gold-standard treatment for primary surgical management and have been used for over 20 years. It is also reasonable to consider that there may be some women who develop recurrent SUI.

Mesh Removal Debate

Friday, October 6

8:15 a.m. - 8:45 a.m.

Exhibition Hall C

Moderator: Christopher Tarnay, MD

Speakers: Roger Dmochowski, MD; Miles Murphy, MD, MSPH

The debate regarding optimal management of a patient who has mesh placed and subsequent functional and/or consequences and complications is ongoing. The complexity of functional outcomes related to pelvic floor interventions clearly makes management of mesh complications a multi-factorial undertaking inclusive of optimization of medical, surgical, and social circumstances to benefit the patient. Topics will include the participants' views on what symptoms are attributed directly to mesh, how much needs to be removed, and the impact of mesh removal on future pelvic floor function.

Prevention of Urinary Incontinence: A Behavioral and Basic Science Perspective

Friday, October 6

10:50 a.m. - 11:35 a.m.

Exhibition Hall C

Moderator: Una Lee, MD

Panelists: Catherine Bradley, MD, MSCE; Marianna Alperin, MD,

MS; Gina Northington, MD, MPH

Join us for a scientific discussion on what we know, what we don't know, and where we are going in the prevention of urinary incontinence. We will review the literature on the pathophysiology of both urgency incontinence and stress urinary incontinence. It is only through a deeper understanding of the potential mechanisms, that we can identify pathways to prevent and treat incontinence now and in the future. This session will spark your clinical understanding and ultimately lead to improved patient care and counseling.

Insights on How to Navigate Product Controversy

Saturday, October 7

9:30 a.m. - 10:30 a.m.

Exhibition Hall C

Moderator: Cheryl Iglesia, MD

Speakers: Julie Cantor MD, JD; Patrick Culligan, MD; Alan

Garely, MD

Product controversies are one of the largest mass torts in history, and it has caught the attention of our specialty. This session will provide an overview and update on the mesh product litigation. We will also review the litigation's timeline, explain multidistrict litigation (MDL), and review key legal issues in the product liability field. The session will also include a discussion with two physicians who have served as experts in this litigation. They will share their perspectives and answer audience questions. The session will also cover the potential impact this MDL may have on our specialty.

Master Surgeon Presentations

Saturday, October 7

10:45 a.m. - 11:30 a.m.

Exhibition Hall C

Get a first-hand look at real-world surgeries on Saturday morning. This session will showcase Laparoscopic Nerve Sparing Surgery and Laparoscopic Hysteropexy and provide an overview of how to control massive blood loss while in the operating room.

LAPAROSCOPIC NERVE SPARING SURGERY

Moderator: Marlene Corton, MD Surgeon: Nucelio Lemos, MD, PhD

LAPAROSCOPIC HYSTEROPEXY SURGERY

Moderator: Felicia Lane, MD Surgeon: Beri Ridgeway, MD

What Are Urogynecologists Going to Get Paid and How?

Saturday, October 7

12:30 p.m. - 1:30 p.m.

Exhibition Hall C

Panelists: Jonathan Gleason, MD; Mitchell Schuster, MD; Samantha Pulliam, MD

This timely session will raise awareness about our professions revenue problem, value transformation, and its implications. Reimbursements are down with no indication of a bounce back. This session will inform you about how value transformation will impact FPMRS, your practice, and how we treat patients with pelvic floor disorders.

SPECIAL SESSIONS These sessions require Pre-registration for an additional fee.

Clinical Seminar: Abnormal Uterine Bleeding: Wading Through the Evidence on Evaluation and **Treatment Effectiveness**

Thursday, October 5

11:00 a.m. - 12:00 p.m.

Room 551

Speaker: Kristen A. Matteson, MD, MPH

Abnormal uterine bleeding (AUB) affects up to 30 percent of women during their reproductive lives and has a major impact on the quality of life of suffering women. While hysterectomy is the definitive treatment for AUB, a multitude of alternative less invasive medical and surgical treatments are available, making selecting the best treatment for the individual patient challenging. This clinical seminar will cover the burden of AUB on women and the healthcare system; the use of FIGO classification system for symptoms and etiologies associated with AUB in order to standardize publications and documentation; and the evidence of effectiveness of treatments for AUB (combined oral contraceptives, progestin, NSAIDs, antifibrinolytics, the levonorgestrel intrauterine system, and endometrial ablation).

Learning Objectives:

 Describe the definitions of abnormal uterine bleeding (AUB) and the terminologies supported by FIGO and ACOG

- Critically evaluate medical and surgical therapies for AUB not caused by structural abnormalities or systemic diseases
- Develop strategies for choosing the best treatment for patients in his/her practice

Surgical Tutorial: Laparoscopic and Robotic Sacrocolpopexy Pearls

Thursday, October 5

4:15 p.m. - 5:15 p.m.

Room 551

Speaker: Elizabeth Geller, MD; Andrew Sokol, MD

This surgical tutorial will outline strategies to maximize efficiency during both laparoscopic and robotic sacral colpopexy. Tips and tricks will be reviewed for patient positioning and docking, optimizing exposure, dissection, and graft fixation.

Learning Objectives:

- Describe optimal patient positioning and docking
- Discuss time-saving strategies for exposing the vesicovaginal, rectovaginal, and pre-sacral spaces
- Employ different techniques for mesh fixation to the vagina during laparoscopic and robotic sacral colpopexy
- Describe techniques for the efficient use of these minimally invasive techniques for sacralcolpopexy

KEYNOTE PRESENTATIONS

RAYMOND A. LEE LECTURE

Thursday, October 5

2:00 p.m. - 2:30 p.m.

Exhibition Hall C

The Raymond A. Lee Endowment is a named lectureship created by AUGS to honor one person annually who contributed to the development and surgical advancement of urogynecology and to further advance the knowledge and teaching of gynecologic surgery through ongoing AUGS educational programs.

Life-long Learning, Loving What You Do, and Paying it Forward

Presented by Marie Fidela Rustia Paraiso, MD

This lectureship will detail Dr. Paraiso's 20-year journey from striving for work-life balance to achieving personal and professional satisfaction. She will discuss the importance of teamwork, mentorship, self-assessment and reflection, and lifelong learning.

Dr. Marie Fidela Paraiso is Professor of Surgery at Cleveland Clinic Lerner College of Medicine, Section Head of Urogynecology at the Cleveland Clinic in Cleveland, OH. She is a graduate of the University of Notre Dame and Indiana University School of Medicine. She completed her OBGYN residency at Good Samaritan Hospital in Cincinnati and her fellowship in Advanced Pelvic Surgery and Minimally Invasive Gynecology at the Cleveland Clinic. She is Board Certified in OBGYN and Female Pelvic Medicine and Reconstructive Surgery. She was Section Head for Urogynecology and Reconstructive Pelvic Surgery at the University of Missouri, Kansas City prior to returning to Cleveland Clinic in 1998, where she currently works. She has completed three executive courses in leadership: Leadership in Healthcare, Leadership in Surgery, and Fast Track Leadership.

Nationally, Dr. Paraiso served twice on the Board of Directors for the American Urogynecologic Society (AUGS) 2000-2003 and 2007 2010, and on the Board Trustees for the American Association of Gynecologic Laparoscopists from 2012-2014. She is currently Secretary Treasurer of AAGL and will serve as President in 2019. Dr. Paraiso has lectured throughout North America, Europe, the Middle East, Asia, Central and South America, and Australia. She has published over 135 manuscripts, 20 book chapters, and a 2014 textbook for Office Gynecology.

J. MARION SIMS LECTURE

Friday, October 6

10:15 a.m. - 10:50 a.m.

Exhibition Hall C

The J. Marion Sims Lecture is presented annually at PFD Week to continue to educate today's gynecological surgeon about the importance of supporting and encouraging innovation within women's health.

Generous support for the J. Marion Sims Lecture is provided by ABOG.

Vesico-Vaginal Fistula: Historical Understanding, Medical Ethics, and Modern Sensibilities

Presented by L. Lewis Wall, MD, DPhil

The 2017 J. Marion Sims Lecture will be delivered by Dr. L. Lewis Wall, Selina Okin Kim Conner Professor in Arts and Sciences at Washington University in St. Louis. The lecture will address the contributions to fistula surgery made by Dr. Sims in the 19th Century

and the controversies that have arisen concerning his operations in the last several decades.

L. Lewis Wall received his medical degree from the University of Kansas School of Medicine and completed his residency training in obstetrics and gynecology at Duke University Medical Center. Dr. Wall did sub-specialty fellowship training in female urology and urodynamics at the University of London (St. George's Hospital) and St. Mary's Hospital for Women and Children in Manchester, England.

He is board-certified in both general obstetrics and gynecology and in the sub-specialty of female pelvic medicine and reconstructive surgery. In addition to his clinical qualifications, he has a master's degree in bioethics from the Center for Human Bioethics at Monash University in Australia.

Dr. Wall has a longstanding interest in the health problems of women in Africa. He founded the Worldwide Fistula Fund in 1995, a not-for-profit public charity dedicated to providing care for women who have developed obstetric fistulas from prolonged obstructed labor.

The Raymond A. Lee Endowment is a named lectureship created by AUGS to honor one person

annually who contributed to the development and surgical advancement of urogynecology and to further advance the knowledge and teaching of gynecologic surgery through ongoing AUGS educational programs.

RESIDENT SCHOLAR AWARDS

This program funds third-year residents who have demonstrated an interest in Female Pelvic Medicine and Reconstructive Surgery to attend the AUGS Annual Scientific Meeting and experience the current research initiatives going on within the field. Each scholar receives a \$1,000 award to cover travel, hotel accommodations, and meeting registration.

PFD RESEARCH AWARD RECIPIENTS

ROBIN HAFF RESEARCH AWARD

Ann Meers, BS, RN, CCRC Friday, October 6 | 8:05 a.m. *Exhibition Hall C*

This award is presented annually to an individual in recognition of outstanding and sustained

contribution to female pelvic floor disorders research. The Robin Haff Research Award recognizes the important role that clinical research nurses and research coordinators play in the clinical research process. Without dedicated and committed research staff, high quality research would not be possible.

Ms. Meers is recognized for her talents, research skills, and passion. She has been involved in research in women's health for 20 years, her interest in pelvic floor disorders piqued when she realized the many unanswered questions existed in the research. She is both a leader within Brown University and externally, where she served as the Chair for the NICHD Pelvic Floor Disorders Network Research Coordinator Committee.

PFD RESEARCH FOUNDATION DONOR OF THE YEAR AWARD

Kimberly Kenton, MD Friday, October 6 | 8:05 a.m. Exhibition Hall C

The PFD Research Foundation presents the Donor of the Year Award to an individual in recognition

of commitment to the Foundation's mission of transforming the lives of women through the support of innovative and effective research that advances the prevention, treatment, and cure of female pelvic floor disorders.

Dr. Kenton is a consistent and generous donor to the Foundation and a strong supporter of the Foundation's mission. Her lifetime donations total is more than \$20,000.

Indications for Use:

Sacral Neuromodulation delivered by the InterStim[™] system for Urinary Control is indicated for the treatment of urinary retention and the symptoms of overactive bladder, including urinary urge incontinence and significant symptoms of urgency-frequency alone or in combination, in patients who have failed or could not tolerate more conservative treatments. The following Warning applies only to Sacral Neuromodulation for Urinary Control:

Warning: This therapy is not intended for patients with mechanical obstruction such as benign prostatic hypertrophy, cancer, or urethral stricture.

Sacral Neuromodulation delivered by the InterStimTM system for Bowel Control is indicated for the treatment of chronic fecal incontinence in patients who have failed or are not

Contraindications for Urinary Control and for Bowel Control: Diathermy. Patients who have not demonstrated an appropriate response to test stimulation or are unable to operate the neurostimulator

For Urinary Control: Safety and effectiveness have not been established for bilateral stimulation; pregnancy, unborn fetus, and delivery; pediatric use under the age of 16; or for patients with neurological disease origins.

For Bowel Control: Safety and effectiveness have not been established for bilateral stimulation; pregnancy, unborn fetus, and delivery; pediatric use under the age of 18; or for patients with progressive, systemic neurological diseases.

For Urinary Control and for Bowel Control: The system may be affected by or adversely affect cardiac devices, electrocautery, defibrillators, ultrasonic equipment, radiation therapy, MRI, theft detectors/ screening devices. Adverse events include pain at the implant sites, new pain, lead migration, infection, technical or device and verse happen in bowel or violing fruction and underirable stimulation; expensions of the progressions. lead migration, infection, technical or device problems, adverse change in bowel or voiding function, and undesirable stimulation or sensations, including jolting or shock sensations. Patients should be assessed preoperatively for the risk of increased bleeding. 1. Kocjancic E, Erickson E, Tu L-M, Gheiler E, Van Drie E. Two-Year Outcomes for the Altis® Adjustable Single Incision Sling System for Treatment of Stress Urinary Incontinence. Neurourol Urodyn. Released electronically October 29, 2016.

*Dry defined in study as 24 hr pad weight of \leq 4.0g

Indications: The Altis Single Incision Sling Systems are indicated for the treatment of female stress urinary incontinence (SUI) resulting from urethral hypermobility and/or intrinsic sphincter deficiency (ISD).

Contraindications: Altis slings should not be used in pregnant women, or in women planning future pregnancies or any patient with potential for future growth. Altis slings should not be used in those who are taking anticoagulant therapy, who have an abnormal urethra, who have an intra-operative urethral injury, are immunocompromised, who have a sensitivity to polypropylene, have a pre-existing local or systemic infection, who are immunocompromised, or women that have a known or suspected pathology which would compromise implant or implant placement.

Warnings and Precautions: It is the responsibility of the surgeon to advise the prospective patients or their representatives, prior to surgery, of the possible warnings and precautions associated with the use of this product and the associated surgical risks. The Altis Sling Systems should only be used by surgeons familiar with the surgical procedures and techniques involving transvaginal placement of non-absorbable meshes and who have adequate education and experience in the treatment of female SUI. Based on physician experience and education, a thorough assessment of each patient should be made to determine the suitability of a synthetic mesh procedure. The patient should be counseled that alternative non-mesh incontinence surgeries may be appropriate, and the reason for choosing a mesh procedure should be explained. Physician should obtain patient consent prior to surgery and ensure that the patient has an understanding of the postoperative risks and potential complications of transvaginal mesh surgery. Patient counseling should include a discussion that the mesh to be implanted is a permanent implant, and that some complications associated with the implanted mesh may require additional surgery; repeat surgery may not resolve these complications. Serious adverse tissue responses or infection may require removal of mesh.

Adverse Effects: Potential adverse events are those associated with surgery using implantable synthetic mesh materials. As with all foreign bodies, the Altis sling is likely to exacerbate any existing infection. Local irritation at the wound site and/or a foreign body response may occur. The following complications are known to occur with synthetic mesh implantation: mesh erosion (e.g., vaginal, bladder), mesh extrusion, mesh exposure, infection, pain (acute or chronic), and bladder, bowel, urethra, vagina, vessel, and/or nerve perforation/injury. There is also the risk of complete failure of the procedure resulting in continued incontinence due to incomplete support or overactive bladder. The occurrence of these events may require partial or complete removal of the sling. Patients should be monitored regularly after the device has been implanted for immediate treatment of any adverse reaction.

See the device instructions for use for detailed information regarding the implant procedure, warnings/precautions, adverse reactions, prior to using this product.
